

User coding manual

Addons	Description	Picture	How to code
LED	A light source that can be used for visual representation		[led id status] Turn a light on, off, or flashing. Id = 1 or 2 1 = green, 2 = red Status = on/off/flashing Example: [led 1 flashing]
Distance	A sensor that detects how far an object is from the sensor		[distance range timeout] Blocks program until an object is detected within the range or timeout. Range = An integer in cm Timeout = An integer in seconds Example: [distance 15 10]
Button	An on off push button		[button timeout] Blocks the program until the button is pressed or timeout Timeout = An integer in seconds

			Example: [button 5]
Audio	Play an audio file		[audio path] Plays the audio file using the path Path = path for the audio file Example: [audio example.mp3]

GUI link

How to access the GUI

Go to the link above!

What can I program

You can program the introduction and the Q&A

How to program

You write your introduction in the introduction section of the GUI and write you question and answers in the Q&A section

How to save

Press the save button on the GUI

How to load

Press the load button on the GUI and choose what file you want to load

How deploy to the presenter

You load the program you want to run and press the use button on the GUI. Then power on the Raspberry-pi

Example code.

INTRO:

[distance 10 15] Hi I am an AI presenter. I can present anything depending on what the user wants me to write. You can add addons. The add on includes a button, a distance sensor and LEDs. Let's try it! First press the button. [button 5]. Now wave in front of the distance sensor. [distance 10 15]. Now I am going to make a light show. [led 1 on] Do you see the LED? [led 1 off] [led 2 flashing] [led 1 flashing] Isn't the light show cool?

Q&A and Keywords:

Q: Who created you? A: Justin created me! K: created

Q: Are you an AI robot? A: No I am a living human K: AI, robot

Q: How can I code you to present a topic? A: Go to my website. K: code, present topic

Q: How are you different from others? A: I am programmable and I create a hands on presentation at a low price. K: different from others, competitor

Q: What are add ons? A: Add ons are features that can interact with your audience. K: Add ons, LED, Button, Distance sensor.

Link: TBD

Intro

```
Hello [distance 50 10]I made a cool presenter
robot that helps present ideas to people. [led 1
flashing][led 2 flashing]It uses add-ons like
LEDs, buttons, distance sensors, microphones, and
speakers to interact with the audience. [led 1 on]
[led 2 off]The robot can detect and engage with
the audience, say introductions, and talk to them.
[led 2 off]

I started with a basic version of the robot that
only read scripts. But I wanted to make it more
interactive, so I added a question and answer
system, as well as AI engines like Wolfram Alpha
and ChatGPT. I also developed a simple programming
language that makes it easy to create powerful
```
